re: Loudonville Community Church

Dear Dick and Duncan,

I think I've said it before. Now that Phase I of the LCC project is complete, I need to say it again. In my opinion, we couldn't have made a better choice than Zandri Construction as CM on our project! Dick, your personal attention to and involvement in our project was somewhat unique in this business and most welcome and appreciated. Duncan, your knowledge of construction combined with your attention to detail in coordinating what was not the simplest of projects was remarkable. You were always there when we needed you, and that was often!

My role as Vice Chairman of the Building Committee gave me an owner's perspective that I don't usually get to see. But thirty years in the steel fabrication business, working with many General Contractors and Construction Managers on all types and sizes of projects, qualifies me at least in part as a critic of construction firms. You were the right people for our project. I thoroughly enjoyed working with you and your people and wish you all the best during this Holiday Season and in the future.

Sincerely,

James A. Stori, PE  
President
