

ST. JOSEPH CENTER Brothers of Holy Cross

RECOMMENDATION

Dick Zandri Construction

I first encountered Dick Zandri when I accepted his bid to construct sixteen additional suites to our already existing building, St. Joseph Center. This first meeting occurred in early fall of 1995.

From that first meeting and many additional meetings during the course of building, I realized that Dick Zandri was a trustworthy, honest, straightforward and conscientious professional. Dick Zandri was a man of his word. I felt confident and assured that I was in good hands, especially since I was the client assigned with the responsibility for a two and a quarter million dollar project.

During the building time of a year and a half, I came to know that Dick Zandri knew his business, his contractors and how to move things along even with the vicissitudes of a severe northeast winter.

Were I to be in need of a construction company for the future, I would not consider any other but Zandri construction.

I also want to highly commend the Construction Supervisor, Bob Laplante. A most pleasant, capable, skilled and stalwart person with whom I had the pleasure of working with for more than two years.

Should you wish to come and see first hand the results of their work, feel free to visit our unique addition called the Brother Ephrem O'Dwyer Pavilion anytime. You will see why it has drawn praise from the many persons who have visited here.
